## From Vice-President's Desk

Education is a systematic, planned attempt to bring about appropriate development & changes in an individual by way of inculcating approved behavior patterns like thirst for knowledge, acquirement of multifaceted skills and values.

While academic excellence is our major thrust, we will provide a platform to the students to showcase their individual talents in all spheres of life. Our approach will be activity based learning, inculcating a scientific temper and spirit of free enquiry.

Teachers ignite curiosity and the desire to learn rather than routinely load our student-teachers with academic burden; a methodology that turns learning into a combination of classroom study, research and scientific discovery. Nevertheless, nothing worthwhile can be achieved without a sense of discipline and thus our students will be expected to conform to high disciplinary standards and to cherish the values of tolerance, fair play, compassion and independent thinking.
